PROFESSIONAL SUMMARY

Computer Science graduate and current MSc Artificial Intelligence student (Heriot-Watt University) bridging full-stack software development with advanced machine learning. Proficient in building responsive interfaces with React and Tailwind CSS, with backend experience in Python and SQL. Specialising in Natural Language Processing (NLP), Large Language Models (LLMs), and Explainable AI (XAI) with hands-on dissertation research. Proven track record delivering technical projects in fast-paced, collaborative environments.

EDUCATION

Heriot-Watt University — MSc in Artificial Intelligence Edinburgh, Scotland
Sept 2025 – Sept 2026 (expected)

- Focus areas: Natural Language Processing (NLP), Large Language Models (LLMs), and Explainable AI (XAI).

Amal Jyothi College of Engineering — BTech in Computer Science Kerala, India
June 2020 – May 2024

- GPA: 6.83

EXPERIENCE

McDonald's — Customer Care Assistant Edinburgh, Scotland
Oct 2025 – Present

- Awarded Employee of the Month in February 2026 for exceptional teamwork, communication, and customer service.
- Collaborated with shift management and team members to ensure smooth operations in a high-volume environment.
- Developed strong interpersonal skills and the ability to perform effectively under pressure.

Acmegrade — Web Development Intern Online
Aug 2023 – Sept 2023

- Implemented responsive design principles to ensure websites are mobile-friendly.
- Developed web applications using HTML, CSS, and JavaScript.
- Helped design and sustain easily navigable web platforms.

PROJECTS

University Projects

Investigating the Faithfulness–Simplicity Trade-off in Generative Adaptive XAI MSc
Dissertation
Python · SHAP · LIME · NLP

- Evaluating and integrating Explainable AI (XAI) tools — specifically SHAP and LIME — to analyse and interpret model outputs.
- Applying NLP techniques and model fine-tuning to improve transparency and trustworthiness of generative AI systems.

Systems Thinking: AI in Financial Services MSc Module
Research · Systems Modelling

- Researched and modelled the application and structural impact of artificial intelligence within the financial services sector.
- Produced an academic analysis examining regulatory, ethical, and operational implications of AI adoption in finance.

Freelance & Personal Projects

Suhool Shinas INTL

HTML · CSS · JavaScript · Netlify

- Designed and developed a fully responsive multi-page e-commerce catalogue website for a premium Omani heritage clothing brand (est. 1990s) selling thobes, headwear, accessories, and perfumes with worldwide delivery.
- Implemented a bilingual English/Arabic interface with full RTL layout switching and a dynamic product catalogue rendered from a JSON data source.
- Built a WhatsApp-integrated ordering flow with pre-filled messages, named collection image lightboxes, concierge hover panels, a PDF catalogue viewer modal, and a cart sidebar with badge counter.
- Delivered a glassmorphism hero design with a gold accent aesthetic — acts as both a digital storefront and brand showcase without a traditional checkout flow.

UrbEstate

React · Tailwind CSS · Vite

- Built a modern real estate website with dynamic property listings and smooth animations, emphasising responsive design and reusable components.

Kobodrop Clone

React · Tailwind CSS · Vite

- Created a functional file-sharing clone with drag-and-drop uploads, download link generation, and back-end connectivity.

FIT — Fitness Website

HTML · CSS · JavaScript

- Built a clean, responsive fitness website with mobile-first design, showcasing workout plans and wellness services.

TECHNOLOGIES

Artificial Intelligence: NLP, LLMs, Explainable AI (XAI), SHAP, LIME, Word2Vec, Model Fine-Tuning

Frontend Development: HTML, CSS, JavaScript, ReactJS, TailwindCSS, Vite

Backend Development: Python, SQL, Node.js (learning)

Version Control: Git, GitHub

Core Competencies: Problem Solving, Responsive Design, Web Performance Optimization, Collaboration

CERTIFICATIONS

Python Full Stack Course — Qspiders, Kochi, Kerala

June 2024 – Sept 2024

- Completed a comprehensive course covering Python full-stack development, including back-end frameworks, database management, and deployment.

Smart India Hackathon 2023

2023

- Selected from campus to participate in the national-level hackathon, contributing to innovative solutions for real-world problems.

Google Cloud Computing Foundations Course

2023

- Gained foundational knowledge in cloud computing, including Google Cloud services, cloud architecture, and cloud security best practices.

Oracle Infrastructure Foundations I

2023

- Completed a course in Oracle infrastructure covering cloud architecture, networking, and storage management. Achieved 84%.

Employee of the Month — McDonald's, Edinburgh

February 2026
